DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On page 1, line 12, the word "seed" should read --speed--.

On page 9, line 1, the phrase "to left and rear wheel" is unclear. It is suggested that the phrase should read -- to left and right rear wheel--.

On page 12, line 2, it is suggested that the number --86-- be inserted after "large-diameter pinion gear".

On page 15, line 7, the word "into" should read --in--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 1 recites the terms "the output shaft" and "the input shaft" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3726

5. Claims 1-3 are also rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The last paragraph of claim 1 states, "the assembly of the front case sub-assembly for bearing the input shaft". This statement fails to clearly point out how or where the front case subassembly attaches to the power transfer apparatus.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maybach (US Patent No. 1,674,557), Meyers (US Patent No. 2,918,832), Krisher et al. (US Patent No. 4,862,363), Ohkubo (US Patent No. 4,873,892), Gassmann (US Pub. No. 2003/0004027 A1).
